

# THREADED HAND NAIL

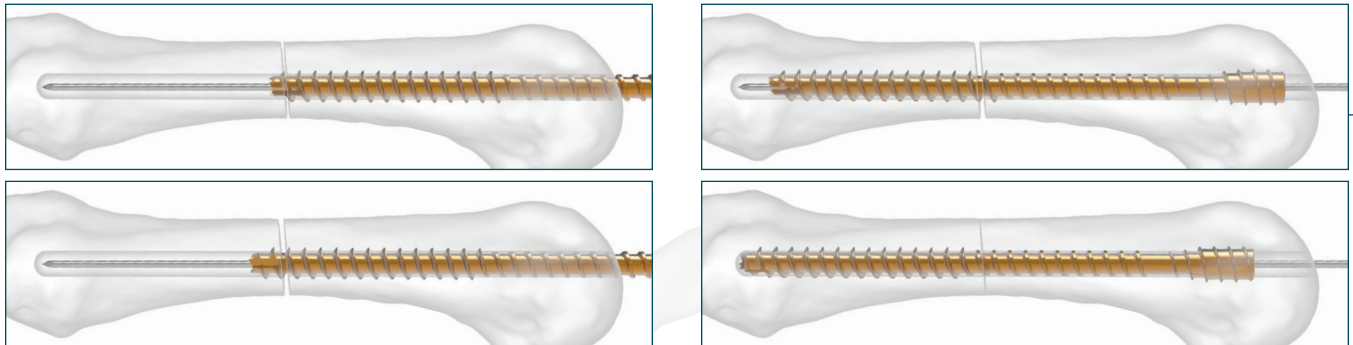

Enabling surgeon-controlled hand fracture repair

# Net Zero Compression™ designed to minimize gapping across the fracture site while avoiding over-compression

Optimized thread design balances nail purchase and canal fill with lower insertion torque

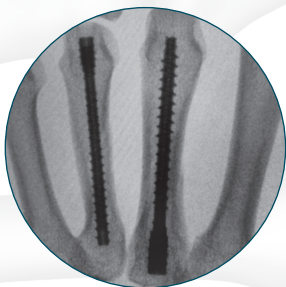

Designed to achieve a fully reduced and stable fracture repair

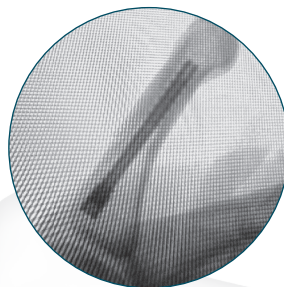

Potential distraction as Nail crosses fracture line

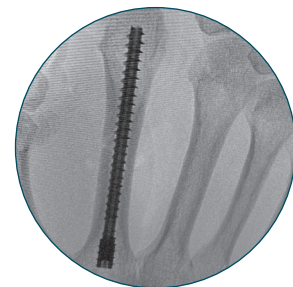

Compensatory translation closes gap with Net Zero Compression™

3rd & 4th metacarpal repaired with 3.5 x 45mm & 4.5 x 50mm Threaded Hand Nails

2nd proximal phalanx fracture repaired with 3.0 x 30mm Threaded Hand Nail

2nd metacarpal fracture repaired with 4.5 x 40mm Threaded Hand Nail
